

Colston Safety and Training, Inc.
LOCKOUT TAGOUT CERTIFICATION

Brief: This program teaches employees who work on equipment or process systems, prevent accidental or inadvertent energizing. In recent fiscal year, there were nearly 3,500 violations for not having a compulsory lockout/tagout program and not following the mandated procedures. Every year, people are killed on the job because they are unfamiliar with the hazards associated with stored energy. Our goal is to help employees and your company prevent these accidents from happening and to reduce the amount of violations that are placed on companies for non-compliance.

TOPICS

Agenda

- Identify Hazards
- Protection Against Hazards
- Safety Procedures
- Lockout/Tagout Devices and Their Use
- Personal Protection Equipment

COMPLIANCE REQUIREMENTS

OSHA 29 CFR 1910.147 states that all companies will have formal Lockout/Tagout program and train their employees in its use.
